- Bootstrap
- Git
- C, C++, Java
- SQL, MS-Access

FARISA JAMSHID

MERN STACK Developer

PROFILE

Highly motivated MERN Stack Developer. Seeking a developer position to apply coding skills and problem-solving abilities in developing innovative solutions within a dynamic software development environment.

EXPERIENCE

MERN FULL STACK DEVELOPMENT

Futura Lab, Kozhikode

May 2023-Aug 2023

- Completed MERN Full Stack Development Internship from Futura Labs.
- Led Dynamic UI creation with React.js.
- Implemented authenticated and authorized server-side logic and API in Node.js for scalability.
- Used MongoDB for efficient database management.

PROJECTS

E-COMMERCE APP

- The E-Commerce App project is a feature-rich online shopping platform built with **React, MongoDB, Node Express**.
- It includes essential functionalities like product categorization, pagination, management, shopping cart functionality, secure payment processing using **Braintree**, and order tracking. Implemented administrative functionalities product and order management.
- Incorporated a secure login and authentication system using **bcrypt** library to ensure the privacy and confidentiality of user data. It uses **jsonwebtoken**, to generate token for each user's while login.

AUTHORISATION SCREEN

- Developed a MERN Full stack app, secure authorized login, the login person can move to user or admin dashboard based specific user role (User or Admin).
- Implemented protected route using middleware concept (multi routing).
- Implemented responsive design principle to ensure seamless browsing over different devices.

WEATHER FORECASTING APP

- Developed responsive Weather forecasting app, using React.js.
- Used open weather map API for implementation.
- <https://farisajamshid.github.io/weather/>

Worked as Lecturer in Computer Science, Calicut University Center, Vadakara. (From Sept 2009 to Dec2015).

CERTIFICATES

- **MERN FULL STACK DEVELOPMENT**, Futura Labs Kozhikode, Kerala
- **React Java Script-Fundamentals to coding-Alison**.
- **UGC NET**
